

Baltimore Urban Program

Executive Summary

Summarizes the Site, Parking, Facility Size, Staff and Contract Health Dollars necessary for the Service Delivery Plan in 2015. Identifies the Direct Care Services Offered to include highlighting any new services. Identifies the communities and population served for each service.

The second page of the Executive Summary documents the priority resource issues as identified through the Master Planning process.

Historical Utilization by Location of Encounter

Documents 3 years of RPMS and contract care workloads provided at the facility predominantly serving the Primary Care Service Area by product line and specialty.

Historical Utilization by Community of residence

Documents 3 years of RPMS and contract care workloads provided to the user population of the Service Delivery Area by product line and specialty.

Market Assessment

Compares the Historical Workload to the Health System Planning software and to national averages of patient care utilization, projecting future workloads based upon the worst case of these three planning scenarios. Also documents the percentage of care that will require contracting due to acuity and the quantity of care that can potentially be served by the direct care system.

Service Delivery Plan

Recommended service delivery plan by product line based upon projected workload, key characteristics, patient classification and tribal and IHS input.

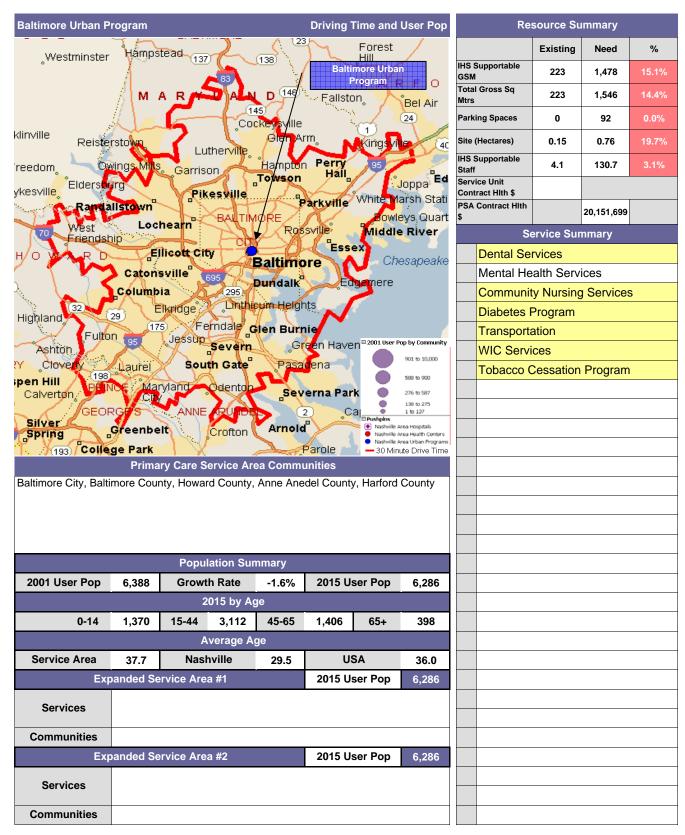

Resource Allocation

Quantifies the necessary space and key characteristics for the Service Delivery Plan and compares them against existing resources. Also tabulates necessary contract health dollars based on the delivery plan.

THE INNOVA GROUP

Executive Summary

Baltimore Urban Program

Executive Summary

Service Area Description

The **Baltimore Indian Center** is a Urban program providing services to Native American residents in the Baltimore area. This Center DOES NOT provide any type of direct medical care to its users. The Center acts a resource center and assists users in obtaining care at a number of local institutions which provide free or reduced fee healthcare services. The Center also provides training for users in Job Procurement, Computer Skills, and a resource center for potential minority job openings. The Center also assists residents that need food pantry services or other types of public assistance programs.

	Services & Resourcing Priorities
1	Increase IHS Funding
2	Make the existing building more functional and create available space on the second and third floors.
3	Development of Public Health Nursing Program
4	Development of Additional Mental Health and Substance Abuse Programs

Ancillary Services

Laboratory Services

Clinical Pathology operates the clinical laboratories and conducts studies, investigations, analyses, and examinations, including diagnostic and routine tests and systems. Additional activities may include, but are not limited to, transportation of specimens from the nursing floors and surgical suites and preparation of samples for testing. The Clinical Lab includes Chemistry, Urinalysis, Hematology, Serology, Immunology and Coagulation.

Lab Totals	27,220	ech Staff @ Peak	2.8	
Pharmacy	63,261	Pharmacists	3.7	63,261
Acute Dialysis	19	Rooms	0.0	19

Acute Dialysis provides purification of the patient's blood using the patient's own peritoneal membrane, located in the abdomen, as the filter to remove excess water and toxins, while the patient is hospitalized. Specialty trained personnel teach all patients own family members through an intense training program how to perform these same functions in the home settings.

Diagnostic Imaging

Diagnostic Radiology provides diagnostic radiologic services to inpatients and outpatients. Activities include, but are not limited to, processing, examining, interpreting, storing, and retrieving radiographs and fluorographs; directing a radiological safety program; and consulting with physicians and patients.

Radiographic	2,168	Rooms	0.4	2,168

Diagnostic Imaging Totals	3,993	Radiologist	0.3	3,993
Nuclear Medicine	0	Rooms	0.0	0
A A				

Nuclear Medicine provides diagnostic nuclear medicine studies, interprets such studies, and performs therapeutic nuclear medicine treatment through the use of injectable or ingestible radioactive isotopes in conformance with licensure regulations. Functions and activities of the work center include, but are not limited to, performing clinical investigative studies, providing whole blood counting, evaluating patients suspected of being contaminated with gamma-emitting radio nuclides, consulting with patients and attending physicians, and maintaining radioactive waste disposal and storage of radioactive materials.
